

Breakfast Seminar Invitation

WEEE & Battery Compliance

Breakfast Seminar Invitation

Weeeco is working with its business partners to deliver a series of Breakfast Seminars that provide the invited delegates with the opportunity of testing their companies WEEE Compliance strategy and to find out if the forthcoming UK Battery Legislation will affect their business operations.

WEEE Regulations

The WEEE (Waste Electrical and Electronic Equipment) 2007 regulations require all Producers of Electrical and Electronic Equipment (EEE) to register with a Producer Compliance Scheme (PCS). A producer is anyone who manufactures, imports or re-brands electrical items for sale in the UK. The Regulations also require Business End Users of EEE to ensure proper environmental disposal when an item is no longer required by them and becomes waste.

Battery Regulations

The Batteries Directive was published in the Official Journal on 26 September 2006. It seeks to improve the environmental performance of batteries and accumulators and of the activities of all economic operators involved in the life cycle of batteries and accumulators, eg producers, distributors and end users and, in particular, those operators directly involved in the treatment and recycling of waste batteries and accumulators.

WEEE need to be Educated

Educating businesses is essential to ensure that industry fully understands the implications of these Regulations. Weeeco have been successful in reducing the financial liabilities of WEEE compliance for clients by up to 80% and we challenge you to take the test at www.weeeco.com

Agenda

- Three 5 Minute Business Case Studies on WEEE Compliance
- A 10 minute look at forthcoming UK Battery Regulations
- An overview of the legal implications of Non Compliance:
 - Megaman – B2C Producer
 - Gentoo – B2C End User
 - Wilton – B2B End User
- What is the Battery Directive?
- Who is affected by the Battery Directive?
- What is the implementation timetable of the Battery Directive into UK Law?
- Why Comply?
- Questions and Networking?

Timings

08.00: Coffee & Breakfast Sandwich

08.15: WEEE Compliance Case Studies

08.30: Battery Compliance

08.40: Legal Implications

Speakers

The principle speaker and the host of the seminars is V.F.Eckerman, the founder of Weeeco. Mr Eckerman has invaluable experience in EEE & WEEE Compliance and manages the implementation service for the Battery legislation for members of WEEE Lite and Northern Compliance. His knowledge of the WEEE directive has allowed the Weeeco business platform to grow into an innovative and respected provider of WEEE services.

Weeeco Business Platform

The Weeeco business platform is a group of companies that work closely together to produce a one stop shop solution of WEEE Compliance and Battery recycling. The platform is as follows:

- **Weeeco Ltd** – a licensed company that provides both B2B and B2C collection solutions that demonstrate Corporate/Social Responsibility, Environmental Sustainability and Cost Effectiveness for the end holders
- **Northern Compliance Ltd** – a licensed company providing B2B compliance membership services
- **WEEE Lite Ltd** – a licensed company providing B2C Compliance membership services to producers of EEE
- **WEEE Suitcase Limited** – a company providing and developing WEEE container solutions that are consistent with the UK WEEE Regulations
